

# JKR Maritime Oil & Gas

## Company Profile

How our thinking transforms the future

RC - 1166636

A reputation for delivering safe and sustainable operating solutions.

# JKR is a provider of fully integrated capabilities for asset optimisation and production solutions to the maritime, oil, gas, energy and water industries.

Our unique position as an independent operator and track record of more than 20 years in operations and maintenance allows us to bring a production mindset to every solution.

With a reputation for delivering safe and sustainable solutions, we work as an integrated team with our clients to enhance FSEQ, cost performance and optimise production.

We provide fully integrated production solutions, comprising a suite of services tailored to our clients.

# Our Commitment

As our business has evolved from its humble beginnings in 2001, we continue to strive for operational excellence in all that we do.

The imperative for safe and sustainable production solutions has never been stronger and remains at the heart of our service offering as we continue to proudly serve our long-term clients who entrust us with their assets year after year.

A culture of collaboration plays a great part in our success. Working closely with our clients, we have been able to develop innovative and integrity measures.

We are committed to delivering fully integrated production solutions that add value for our clients, our people and the communities in which we work.

To our people, clients, stakeholders and friends, I thank you for your continued commitments to JKR.

**Stevie Nash Ozono**  
Chief Executive Officer

Making operations strategies  
a reality for our clients.

# The JKR Maritime Oil & Gas Way

The JKR Maritime Oil & Gas Core Value are the DNA of our business, reflecting our strong safety culture and effective working relationships, respecting the culture, diversity and values of others.

They support our vision, “To be a leading provider of fully integrated operations, maintenance, projects and advisory services, adding value for our clients, our people and the communities in which we work”.

Our Integrated Management System (IMS) enables delivery of safe, sustainable and high-quality solutions to our clients. It provides a safe and healthy workplace for our people, as an environmentally responsible member of the community. It is a platform that demonstrates our Core Values and allows us to follow through on commitments to our clients, our people and community.

## Our Core Values

# 24/7

## Safety from every angle

We are committed to achieving zero injuries across our business and underpinning this is our safety culture program: 27/7: Safety from every angle.

Its number one goal is for everyone to return home from work safely and encourages proactive thinking about safety from every angle before proceeding with any task. By taking personal responsibility for our own safety and safety of our workmates every day, we believe Zero Harm is achievable at JKR Maritime Oil & Gas.

# Operations

**Making Operations Strategies a Reality**

At JKR, we have experience with the full range of production facilities, from supporting early development of oil and gas basins to being at the forefront of well optimisation and ground-breaking carbon sequestration delivery.

We work seamlessly with organisations across all phases of the asset lifecycle, continually seeking solutions to deliver technical and commercial success.

Our operations support services are focussed on safety maximising profits for our clients by optimising production and minimising deferrals while protecting long term asset integrity.

With the capability to hold a safety case (onshore and offshore), we understand the requirements of different facilities and jurisdictions.

# EXPERTISE

## Projects

**Delivered with a Production Performance Mindset**

Our multi-disciplined team of engineers and project managers support clients throughout each stage of the asset/project lifecycle.

Our operations and maintenance experience provides invaluable insights into design, with our team working from concept through to installation, commissioning and operations.

Our range of project support services include:

- Engineering projects and field development
- Well delivery and workover management
- Subsea inspection, maintenance and repair
- Decommissioning
- Technology and innovation
- Specialist fabrication, assembly, instrumentation and installation

Procurement, logistics and supply chain are the engine room of converting innovative design into a quality, on-time, cost effective solution. Long term relationships with key suppliers are key to the delivery of quality projects.

Our procurement and project management systems make sure cost, schedule and quality is highly visible and monitored.

## Advisory
